PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of hands-on experience in AWS, Kubernetes, CI/CD, and Infrastructure as Code, supported by a strong background in IT infrastructure and cloud administration. Skilled in designing and deploying cloud-native microservices platforms, implementing GitOps workflows using ArgoCD, and automating infrastructure using Terraform. Strong foundation in system administration, networking, and cloud operations, enabling reliable and scalable production environments.

CORE SKILLS

Cloud: AWS (EC2, EKS, IAM, S3, RDS, ALB, VPC), Azure
DevOps: CI/CD Pipelines (GitHub Actions, GitLab, Jenkins), GitOps (ArgoCD)
Containers: Docker, Kubernetes (EKS, k3s), Helm, Ingress Controllers
IaC: Terraform, Ansible, CloudFormation
Monitoring: Prometheus, Grafana, CloudWatch
OS & Scripting: Linux, Bash
Networking: VPC, Subnets, Security Groups, Load Balancing
Databases: PostgreSQL, MySQL

PROFESSIONAL EXPERIENCE

DevOps Projects & Freelance Experience | Nov 2025 – Present

- Deployed e-commerce application on AWS using VPC, EC2, S3, ALB, Auto Scaling and RDS components for freelance client
- Built end-to-end CI/CD pipelines using GitHub Actions, enabling automated build and deployment workflows
- Developed production-style DevOps portfolio projects simulating real-world environments. Strengthened skills through advanced DevOps training.

DevOps Engineer / AWS Cloud Engineer
MTG TECHSOFT, Ranipet | Nov 2023 – Oct 2025

- Deployed containerized microservices on Kubernetes (EKS/k3s) using Docker and Helm, improving deployment consistency
- Deployed e-commerce application on Azure Cloud using Azure PaaS.
- Built and maintained CI/CD pipelines using GitHub Actions and Jenkins, reducing manual deployment effort by ~60%
- Provisioned AWS infrastructure using Terraform, including VPC, ALB, Auto Scaling, and RDS
- Implemented GitOps workflows using ArgoCD, enabling automated and version-controlled deployments

- Designed highly available architectures ensuring scalability and fault tolerance
- Implemented monitoring and alerting using Prometheus, Grafana, and CloudWatch for proactive issue detection

---

Cloud Administrator
B.C.M. Higher Secondary School, Dewas | May 2021 – Nov 2023

- Managed AWS & Azure environments (VMs, storage, networking, IAM/RBAC)
- Administered Linux & Windows servers ensuring performance and security
- Configured VPCs, subnets, and security groups for secure infrastructure
- Deployed and maintained web applications and database systems in cloud environments
- Supported academic infrastructure including labs, application environments, and network systems
- Troubleshot infrastructure, network, and system-level issues across cloud and on-prem environments
- Implemented backup & disaster recovery strategies
- Monitored infrastructure using CloudWatch and system monitoring tools
- Automated routine administrative tasks using shell scripting

---

System Administrator
B.C.M. Prominent School, Dewas | Jul 2016 – Apr 2021

- Managed Windows/Linux servers, Active Directory, DNS, DHCP
- Implemented backup and disaster recovery solutions ensuring 99% uptime
- Configured network infrastructure, firewalls, and endpoint security
- Automated administrative tasks using shell scripting and cron jobs

---

Technical Support Engineer (L2)
TuneUp System Software, Bangalore | Jan 2014 – May 2016

- Provided L2 technical support for OS, networking, and enterprise applications
- Troubleshot and resolved escalated system issues efficiently
- Installed and configured operating systems, email clients, and enterprise tools

---

Group Leader (L1 Support)
C Cubed Solutions, Bangalore | Aug 2012 – Oct 2013

- Led L1 support operations and improved ticket resolution efficiency
- Handled OS, email, and hardware troubleshooting

EARLY EXPERIENCE

Computer Operator & Science Lab Assistant
B.C.M. Prominent School, Dewas | Jul 2003 – Apr 2010

- Supported lab operations and handled basic computer operations and data entry

---

PROJECTS (DEVOPS PORTFOLIO)

Emart DevOps Platform

- Built microservices-based application deployed on Kubernetes (EKS)
- Implemented GitOps workflow using ArgoCD for automated deployments
- Designed CI/CD pipelines using GitHub Actions for zero-downtime releases

AWS EKS Microservices Platform

- Provisioned infrastructure using Terraform for EKS-based deployment
- Containerized applications using Docker and deployed on Kubernetes
- Configured ALB ingress and service routing

Cloud-Native E-Commerce (AWS)

- Designed scalable architecture using ALB, Auto Scaling, CloudFront, and RDS
- Deployed highly available web application on AWS infrastructure

GitOps EKS Platform (VProfile)

- Implemented GitOps workflow using ArgoCD and Helm
- Managed Kubernetes deployments with version-controlled configurations

Monitoring Stack

- Built monitoring solution using Prometheus, Grafana, and Alertmanager
- Configured alerting and dashboards for system observability

CERTIFICATIONS & TRAINING

 DevOps & Cloud

- AWS Cloud Computing & DevOps (Training Program) — MNP Technologies
- AWS DevOps with Projects (Course) — Udemy
- Azure Administrator – AZ 104 (Training Program) — Pragathi Technologies

 Infrastructure Foundation

- VMware vSphere ESXi & vCenter Administration (Course) — Udemy
- Computer Hardware & Networking (Certification) — Jetking

EDUCATION

B.Sc. — St. Mary's College, Sulthan Bathery
